What are status codes HTTP?

An HTTP status code is a **server response to a browser's request**. When you visit a website, your browser sends a request to the site's server, and the server then responds to the browser's request with a three-digit code: the HTTP status code.

200-success

400-Bad Request

401-Un authorized

404-Not found

500-Internal server error

502- Bad gateway

Follow for more details: https://en.wikipedia.org/wiki/List_of_HTTP_status_codes

Code:

```
const express = require('express')// Express module just as you require other
modules and puts it in a variable. var app = express(); => Calls the express
```

```

function "express()" and puts new Express application inside the app variable (to
start a new Express application)
const app = express();//create instance of express
const port = 3000 // server will run on this port (You can change the port number
)
//NB: same port number you can't run different node project at the same time.

//*****HTTP STATUS CODE*****
http://localhost:3000/ilove/cricket/soumya

```

```

var datastore=[]
app.post('/ilove/:play/:name', function(req, res) {
  var choice = req.params.play;
  var name = req.params.name;
  if (name=='soumya'){ // check the name is matching or not
    datastore.push({choice: choice,name: name});
    var responseObject = { message: 'Hey ' + name + ' i love ' + ' ' + choice +
' too! ' }; //concatination
    res.send(responseObject);
  }
  else{
    res.status(400).send();//when you post the data if its matching the name
with soumya then data will be post with success 200 status code otherwise it will
show 400 err status code.
  }
});

```

```

app.get('/iloves',function(req, res){
  if (datastore.length==0){ // if datastore is empty then it will show 404
http error status code
    res.status(404).send()

  }else{
    res.send(datastore); // if any value is present inside the datastore then
it will show 200 success message.
  }
})

```

```
app.listen(port, () => {
  console.log(`Example app listening on port ${port}`)
})
```

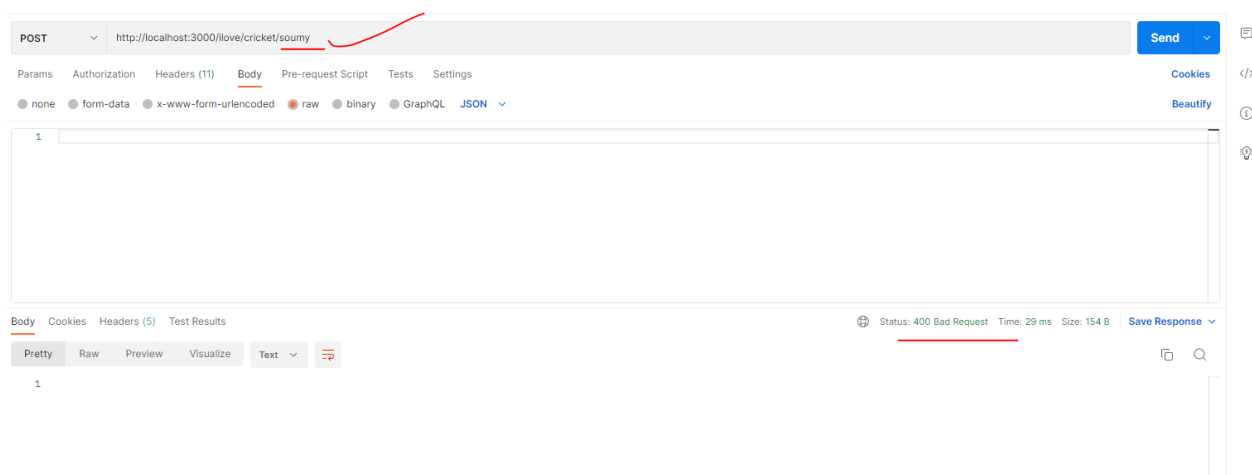

POST Request:

Success: 200 <http://localhost:3000/ilove/cricket/soumya>

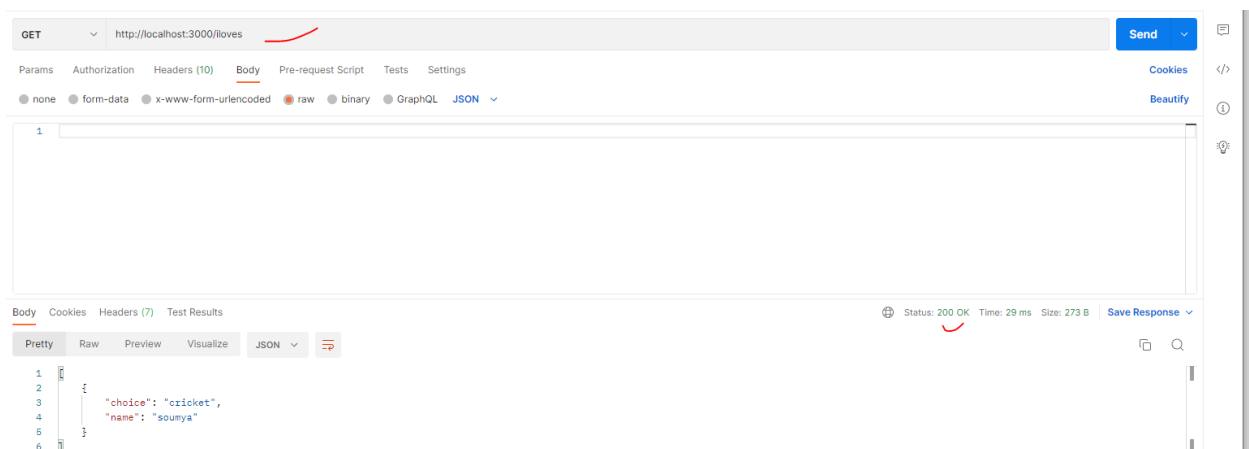

Error:400 <http://localhost:3000/ilove/cricket/soumy>

Error comes because mismatch with name compare with above image

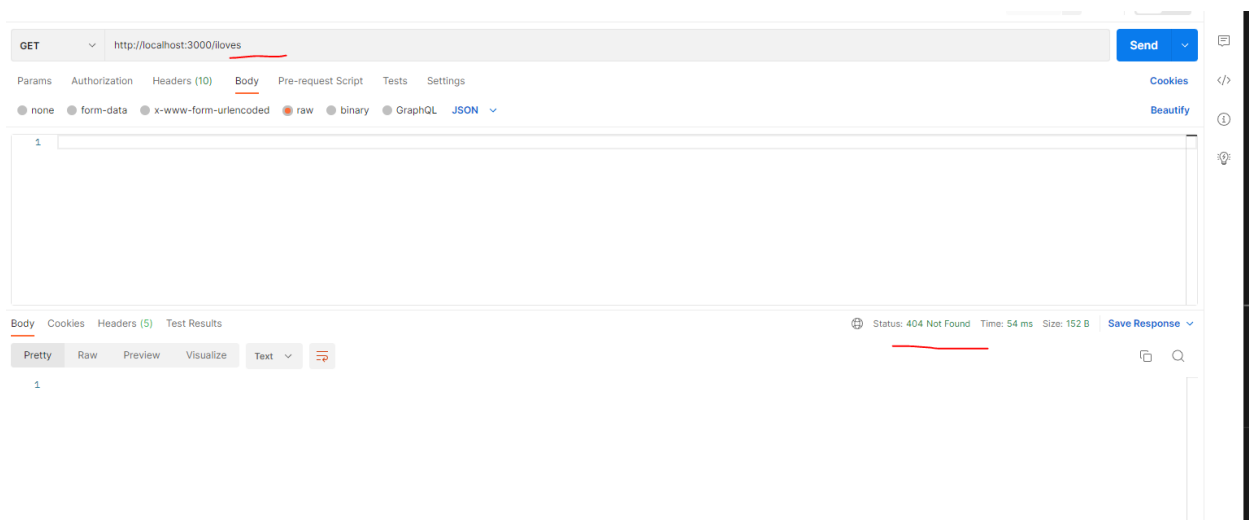

GET Request:

Success :200

Error:404

When [] is blank it will show this error status code. Check the code
